

Colorectal Cancer Screening Report

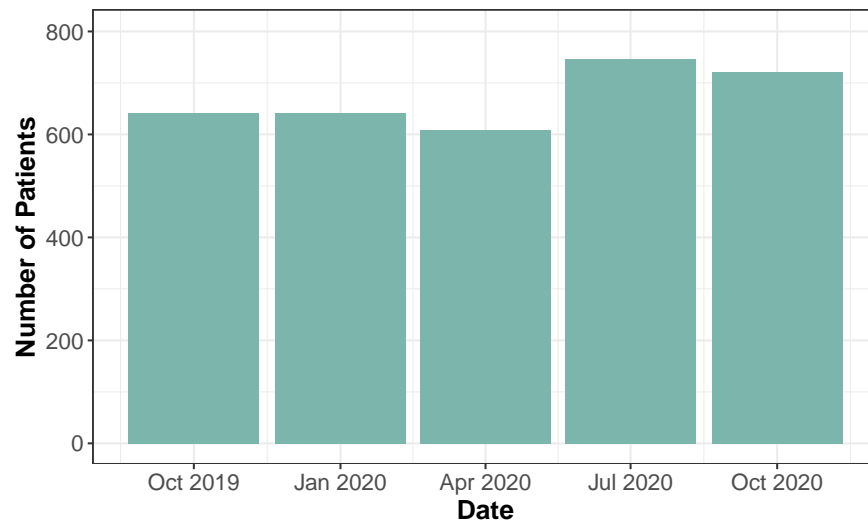

Notes on patient data:

All patients: Active patients between 50 and 75 years of age that DO NOT have colorectal cancer that had a medical visit during the 3 years prior to the end of the reporting period.

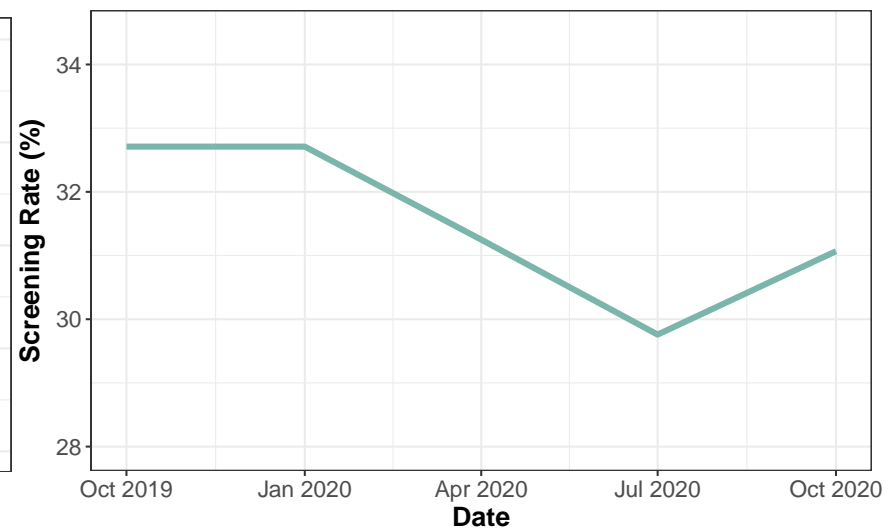

Screened patients: Patients that received Colonoscopy in the last 10 years; Fecal Immunochemical Test (FIT) in the last 1 year; Fecal Occult Testing (FOBT) in the 1 year; or FIT DNA in the last 3 years.
